## **DETAILED ACTION**

This Office Action is in response to the filing of the application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-15 and 19-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Najafi et al. (U.S. Patent 6,140,144).

Najafi discloses a MEMS device (Figs. 2f and 7d) that contains a glass first structure (2) having a front and backside, a microelectromechanical system (4) formed on the front side of the first structure, a second structure (22) bonded to first structure by surface mount connection (solder bump (14)) to form a hermetic cavity (21), an open area (3) in the first structure under the system (Fig. 2f (Column 5, lines 1-6)), a plastic cover (27) over the backside of the first structure closing the open area and is adhesively secured and contacts that connect to the system.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2822

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-18 and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Najafi.

Najafi discloses all the limitations except for the system to be of a certain type. In regards to the systems being an acoustic resonator, a switch or a transmission line, since it is a MEMS device and they are all forms of MEMS devices it would be obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Najafi by incorporating the system to be an acoustic resonator, switch or transmission line since they are all forms of MEMS device.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
